

# BaseLine™

## Standards

- ASTM C1396
- BS 1230
- BS EN 520
- BS 476 PART 4
- BS 476 PART 6
- BS 476 PART 7

**Gyproc**  
SAINT-GOBAIN

BaseLine™ is a standard gypsum board with ivory face paper universally used for wall partitions, wall linings and ceiling systems. It is non-combustible and has superior thermal insulation. BaseLine™ is smooth and level, giving a beautiful appearance ideal for interior walls and ceilings.

#### Technical Information

##### Characteristics

A standard gypsum board, consist of an aerated gypsum core encased in, and firmly bonded to strong paper liners.

##### Application

Suitable for most application where normal fire, structural and acoustic levels are specified and suitable for all direct decoration.

##### Thickness

- 12.5mm
- 15mm

##### Nominal Sizes

- 1200mm x 2400mm
- 1220mm x 2440mm (4' x 8')

##### Edge Type

###### Square Edge, SE

###### Recessed Edge, RE

For other specs, please contact our Customer Service department

##### Certified by

- Jabatan BOMBA dan Penyelamat Malaysia
- TÜV SÜD PSB Corp Pte Ltd

##### Fire Resistance

- Non-combustible material in accordance with BS 476 Part 4
- Class O material when tested in accordance with BS 476 Part 6 & 7
- Provides up to 60 minutes fire resistance in accordance with BS 476 Part 22 (BaseLine™ in GypWall® system)

##### Thermal Insulation

- Thermal resistance value (R) between 0.06-0.1 sq m K/W (depending on thickness)
- Low thermal convection (U) between 10-16.7K/W (depending on thickness)

##### Workability

- Lightweight
- Quick and easy installation
- Highly flexible in creating the highest standards of design
- Easily decorated with paint, tiles wallpaper, etc.
- Bending radius of minimum 3.6m

##### Health and Environmental Friendly

- Recyclable material
- Does not produce toxic fumes or hazardous substance that are harmful to health
